## MYSTERY OF THE "BALL OF FIRE"

The "ball of fire" mystery, with an explosion also thrown in for good measure, was still unexplained last night. Isle of Man people saw and heard it at about 2-30 a.m. yesterday,

### Ghana Republic "advantage to chiefs"

ACCRA, Friday.—Mr. Ako Adjei, Ghanaian Justice Minister, in an interview to-day said that the people of Ghana "are already republican in their ideas and in all aspects of their social and political organisation."

"If Ghana becomes a republic," he added, "we shall, in fact, be acting in conformity with the principles of our traditional and indigenous institutions—principles on which chieftaincy in Ghana is based."

"If Ghana becomes a republic it will be to the advantage of the chiefs because they will not suffer the enjoyment of any advantages, privileges or immunities they enjoy to-day."

Yesterday, Mr. Adjei, addressing the Joint Provincial Council of the West at Dodowa, said that the Government had no intention of abolishing a republic, but that it was so if this was the desire of the people.

The only major change which would place if Ghana became a republic would be that the General would be re-elected President.

### ster stoned

Ghana's Minister of Justice was stoned to-day as he passed the place of Sir Osei Osei, "Chief of the anti people. A police said. An inspection was made in Ashanti.

### ATION

of Shaw was re-shiping meeting

and reports also came from the West Country and the Brecon Beacons.

But last night weather experts said it had nothing to do with the weather, the Air Ministry said no aircraft was missing. A Meteorological Office spokesman said there had been no reports of a meteorite.

On the Isle of Man they saw a vivid flash accompanied by a "terrific bang" and followed by a rumbling noise.

### Ship's paint

A Fleetwood trawler skipper, Mr. Fred Sutton, told his firm by radio from the Atlantic yesterday: "A funny thing happened to us last night. The white paint on the front of the bridge vanished."

Skipper Sutton was in his cabin during the night as the trawler Ella Hewett steamed to Iceland past the Isle of Man.

"The paint was definitely there before I went to bed," he told the owners. "But this morning only the red-lead undercoat was left."

The man on watch told him he saw a flash during the night but did not take much notice because he thought it was lightning.

Armagh Observatory received reports of a bright object in the sky about 2-30 a.m., but Dr. E. M. Lindsay, the director, says it was probably a fire-ball.

He also discounts a report from east Belfast, where a man saw an "arrow in the sky, with a long, flaming tail" at 4-25 p.m.

At the Royal Observatory, Herstmonceux (Sussex) a spokesman said that they attached no importance to the reports of the "ball of fire." "We get two or three reports like that most nights," he said.

### U.N. CHIEF FLIES TO MIDDLE EAST

Mr. Hammarskjöld, U.N. Secretary General, expressed optimism about the outcome of his mission before he left New York by air last night for the Middle East. He is to try to ease Arab-Israeli tensions. Reuter.

# MYSTERY OF THE "BALL OF FIRE"

The "ball of fire" mystery, with an explosion also thrown in for good measure, was still unexplained last night. Isle of Man people saw and heard it at about 2-30 a.m. yesterday,

## Ghana Republic "advantage to chiefs"

ACCRA, Friday.—Mr. Ako Adjei, Ghanaian Justice Minister, in an interview to-day said that the people of Ghana "are already republican in their ideas and in all aspects of their social and political organisation."

"If Ghana becomes a republic," he added, "we shall, in fact, be acting in conformity with the principles of our traditional and indigenous institutions—principles on which chieftaincy in Ghana is based."

"If Ghana becomes a republic it will be to the advantage of the chiefs because they will not suffer the enjoyment of any advantages, privileges or immunities they enjoy to-day."

Yesterday, Mr. Adjei, addressing the Joint Provincial Council of the Volta region at Dodowa, said that the Government had no intention of abolishing a republic, but that it would do so if this was the desire of the people.

The only major change which would take place if Ghana became a republic would be that the General would be replaced by an elected President.

### Chief stoned

Ghana's Minister of the Interior was stoned to-day as he passed the place of Sir Osei Agyemang, "Chief of the Ashanti people. A police officer said. The Minister was on an inspection tour in Ashanti.

### ATION

of Shaw was re- Shipping meeting

and reports also came from the West Country and the Brecon Beacons.

But last night weather experts said it had nothing to do with the weather, the Air Ministry said no aircraft was missing. A Meteorological Office spokesman said there had been no reports of a meteorite.

On the Isle of Man they saw a vivid flash accompanied by a "terrific bang" and followed by a rumbling noise.

### Ship's paint

A Fleetwood trawler skipper, Mr. Fred Sutton, told his firm by radio from the Atlantic yesterday: "A funny thing happened to us last night. The white paint on the front of the bridge vanished."

Skipper Sutton was in his cabin during the night as the trawler Ella Hewett steamed to Iceland past the Isle of Man.

"The paint was definitely there before I went to bed," he told the owners. "But this morning only the red-lead undercoat was left."

The man on watch told him he saw a flash during the night but did not take much notice because he thought it was lightning.

Armagh Observatory received reports of a bright object in the sky about 2-30 a.m., but Dr. E. M. Lindsay, the director, says it was probably a fire-ball.

He also discounts a report from east Belfast, where a man saw an "arrow in the sky, with a long, flaming tail" at 4-25 p.m.

# "Moped" licences for 15

By "Owner-Driver"

It is, unfortunately, only on the rarest occasions that proposals for new motoring legislation by the Government meet with approval by at least a section of the motoring community. One of these rare proposals is that made

recently in which the Government indicated their willingness to examine the possibilities of permitting young people of 15 years of age to drive motorised bicycles of the "moped" category. The Government, I should explain, is that at Westminster, but I have no doubt that any action taken will be considered by the Ulster Government.

Now I cannot expect many parents to greet the announcement with any great joy, but I am convinced that by permitting the use of these small machines at the age of 15 and, by the same token, debarring 16-year-olds from using some of the extremely fast motor cycles available, the interests of road safety will be served while the young people will have an enforced measure of "progressive driving" which will be to their advantage.

That indefinable quality of "road sense" cannot, unfortunately, be acquired from books, and at 15 years of age one is mature enough to profit from practical experience of road conditions.

## Two unusual cars tested

During the past few days I have had an opportunity of trying two cars, both Hillman Minx models, which were rather outside the normal standard versions of this popular car. The first was fitted with Mannumatic two-pedal transmission, in which no clutch pedal is employed. It was of special interest in that it was the first two-pedal car I have tried in which the gear lever was of the steering-column type. This two-pedal control, I should report, is available to all Minx buyers as an optional extra.

In the Minx, the simple action of grasping the gear-shift lever is sufficient to bring the Mannumatic

Prunella

Spizella

Junco

Hebrew

In forenoon I saw a number of the latter in the garden.

8th, 9th, 10th August 1917. Very dry & sunny, with drizzle, heavy rain, & fog. The wind almost down to our level & left us in a depression period. I then had a very strong wind & had looked at the weather. Swifts: have seen none for a long time. Newcastle has departed by last week of July. I am not in the best of health.

# Mystery object in sky was 'like blazing football'

## says eye-witness

THE phone at Armagh Observatory rang almost continuously last night with reports of the flaming object, the appearance of which over the Isle of Man early yesterday was accompanied by a loud explosion.

Mr. Frank Kielty, a Belfast Corporation bus conductor, who saw the object from his home at Comber just before 2-30 a.m., described it as "like a great, blazing rugby football."

He added: "Suddenly, the whole place was lit up by a brilliant white light. Looking up, I saw a large,

Miss Tease.

very bright thing low in the sky in the direction of Ballygowan. It moved towards Bangor and at times it seemed to have a brilliant tail to it.

"It was so large and bright, I've never seen anything like it. I must have watched it for 20 or 30 seconds, before it disappeared in the direction of the Isle of Man."

Among those who saw it were members of the staff at Nutt's Corner Airport and a Belfast-born Coastguard, James Harvey (30), who was just coming off duty at his station nine miles from Douglas.

Mr. Harvey said that the object was "miles up" and certainly nothing like a shooting star or a meteor.

Dr. E. M. Lindsay, the director of Armagh Observatory, said that an examination of the reports suggested that the object was a meteor—possibly a bolide or exploding meteor.

"It certainly could not have been the rocket of the first satellite, which was seen yesterday."

Another report of sighting a mystery object came to-day from Miss Kathleen Tease, a 19-year-old Belfast office worker.

Miss Tease said that when she got off a bus at Legacurry, near Hillsborough, at 6-15 last night, she saw a "bright yellow light" in the south-west, moving slowly towards the west. It was low on the horizon and at times seemed to have a bright tail.

Miss Tease said that the object was also seen by her parents, Mr. and Mrs. John Tease, and by her friend, Miss Irene Clarke, of Cabra.

## 'NOTHING NORMAL'

"I am interested in astronomy, and it was definitely nothing normal," she added.

As an aid to observers who may be looking out for the "death-fall" of the Russian rocket, which would Lindsay has suggested a watch probably be visible in daylight, Dr. at 7, 9 and 11 a.m., south-east to north-west; and 1.30, 3.30, and 5.30 p.m., north-west to south-east.

These times applied for the next few days, he said, adding: "Everything is very uncertain about the rocket just now, and it is impossible to make firm predictions."

The rocket, he thought, might be seen to-morrow in the south-west at 4.20 or 4.56 p.m.

Sputnik II, which was spotted yesterday morning by Mr. Ronald Fails, of Finaghy, may be seen to-morrow at 5.58 a.m.

Professor A. C. B. Lovell, in charge of the Jodrell Bank (Cheshire) radio telescope, said to-day that it might well be that the rocket of Sputnik I has already come down.

**BUY** your new Triumph through the officially appointed dealer—Wilson & Leeper, Limited, Ulster's Permanent Motor Show, 33-49 Bridge End, Belfast.

80.

1<sup>st</sup> Nov 1957. Dull day.

Went to the garden  
from 9.30 to 11.30  
and did the following:  
removed the old plants  
of the garden  
from the garden  
took me about 15 mins. of work  
and the garden was  
left in a state of confusion.

2<sup>nd</sup> Nov. A nice day with  
apparent frost in the morning  
but very much milder in the  
afternoon. The sun shone  
entirely, though barometer fell in evening.  
In forenoon I removed the old plants  
from the garden and the  
garden had for some months  
I got a bonfire burning to get rid of the vegetation  
shipped from the front of the house, the old plants  
of the garden were taken to the garden. The plants  
of which (Mexican) were the biggest and the most  
with a few flowers open for about a week.

sunset. Spent few minutes looking at the  
scudling in front of me, looking at the light  
of road surface from the car. I did not  
get the car moving.

At about 2.23 AM there was a very bright light  
in the sky. It was brilliant and from the sky I appeared  
to be looking out of the window. I was looking at the  
end of the rocket belonging to the rocket. I did not  
but no one else seemed to see it. I was within  
of any meteorite report in the area. The illumination

96.

10th Dec. 51. A fine day with  
sun & light breeze. The  
temperature was in the  
lows.

The wind was light & variable  
S.W. & at times N.E. & on the approach of the  
front a cold wave of air came in.  
Unpacked & loaded in the forenoon & after  
noon. The weather was fine & the  
S. side of the garage is now open. The  
at first very simply from 9 till 11 AM, then  
undecided. Much snow - Scotland - 11 of the  
last 36 hours - a large hilly garden - some  
on the higher hills. 23rd Feb. 4. Last day.

Later in evening the wind dropped & the sun  
shone all night. The temperature was in the  
lows. The wind was light & variable  
S.W. & at times N.E. & on the approach of the  
front a cold wave of air came in.  
Unpacked & loaded in the forenoon & after

12th Dec.

After some light rain, the day was  
 & the little green lizards came  
 flying out of the trees & bushes  
 & they were all of the same  
 kind. They were all of the same  
 size & shape & color. They were all  
 of the same size & shape & color.

On the 13th of Dec. I went to the  
 river & saw a lot of the same  
 lizards. They were all of the same  
 size & shape & color. They were all  
 of the same size & shape & color.

On the 14th of Dec. I went to the  
 river & saw a lot of the same  
 lizards. They were all of the same  
 size & shape & color. They were all  
 of the same size & shape & color.

On the 15th of Dec. I went to the  
 river & saw a lot of the same  
 lizards. They were all of the same  
 size & shape & color. They were all  
 of the same size & shape & color.

On the 16th of Dec. I went to the  
 river & saw a lot of the same  
 lizards. They were all of the same  
 size & shape & color. They were all  
 of the same size & shape & color.

On the 17th of Dec. I went to the  
 river & saw a lot of the same  
 lizards. They were all of the same  
 size & shape & color. They were all  
 of the same size & shape & color.

On the 18th of Dec. I went to the  
 river & saw a lot of the same  
 lizards. They were all of the same  
 size & shape & color. They were all  
 of the same size & shape & color.

On the 19th of Dec. I went to the  
 river & saw a lot of the same  
 lizards. They were all of the same  
 size & shape & color. They were all  
 of the same size & shape & color.
